README

Passenger Car Repair Guides (MY2020+)

Brand-by-brand repair guides for passenger cars manufactured from **2020 onward** in **Japan**, the **United States**, and **China**.

Each brand file includes many field examples with symptoms, diagnosis steps, and repair procedures. Hybrid (HEV/PHEV/EREV) and battery-electric (BEV) systems are covered in depth.

A single index of those cases and their repairs is in malfunction-cases-2020-plus.md.

Great Wall and Hongqi compiled: china-great-wall-hongqi.md.

Japan

Brand	File

Safety reminder

Orange HV circuits require OEM lockout, Class 0 PPE, and isolation verification before service. This material is a technician field aid—always confirm against VIN-specific OEM service information, TSBs, and recalls.
